

A large, bold, white text overlay on a dark green background. The text is split into two lines: "COMPANY" on the top line and "PROFILE" on the bottom line. The background of the slide is a photograph of a modern city skyline at dusk, with several tall glass skyscrapers reflecting in a body of water. A paved walkway and some greenery are visible in the foreground.

ABOUT **OUR COMPANY**

Distraction takes many forms in various locations, such as rain, footsteps, engine noise, airplanes, road traffic noises, and music. In addition to the various disturbance challenges, there are also architectural challenge where materials must be able to blend in with the architectural design. Then, physical challenges in the form of extreme conditions such as humidity, air temperature, dust, and others.

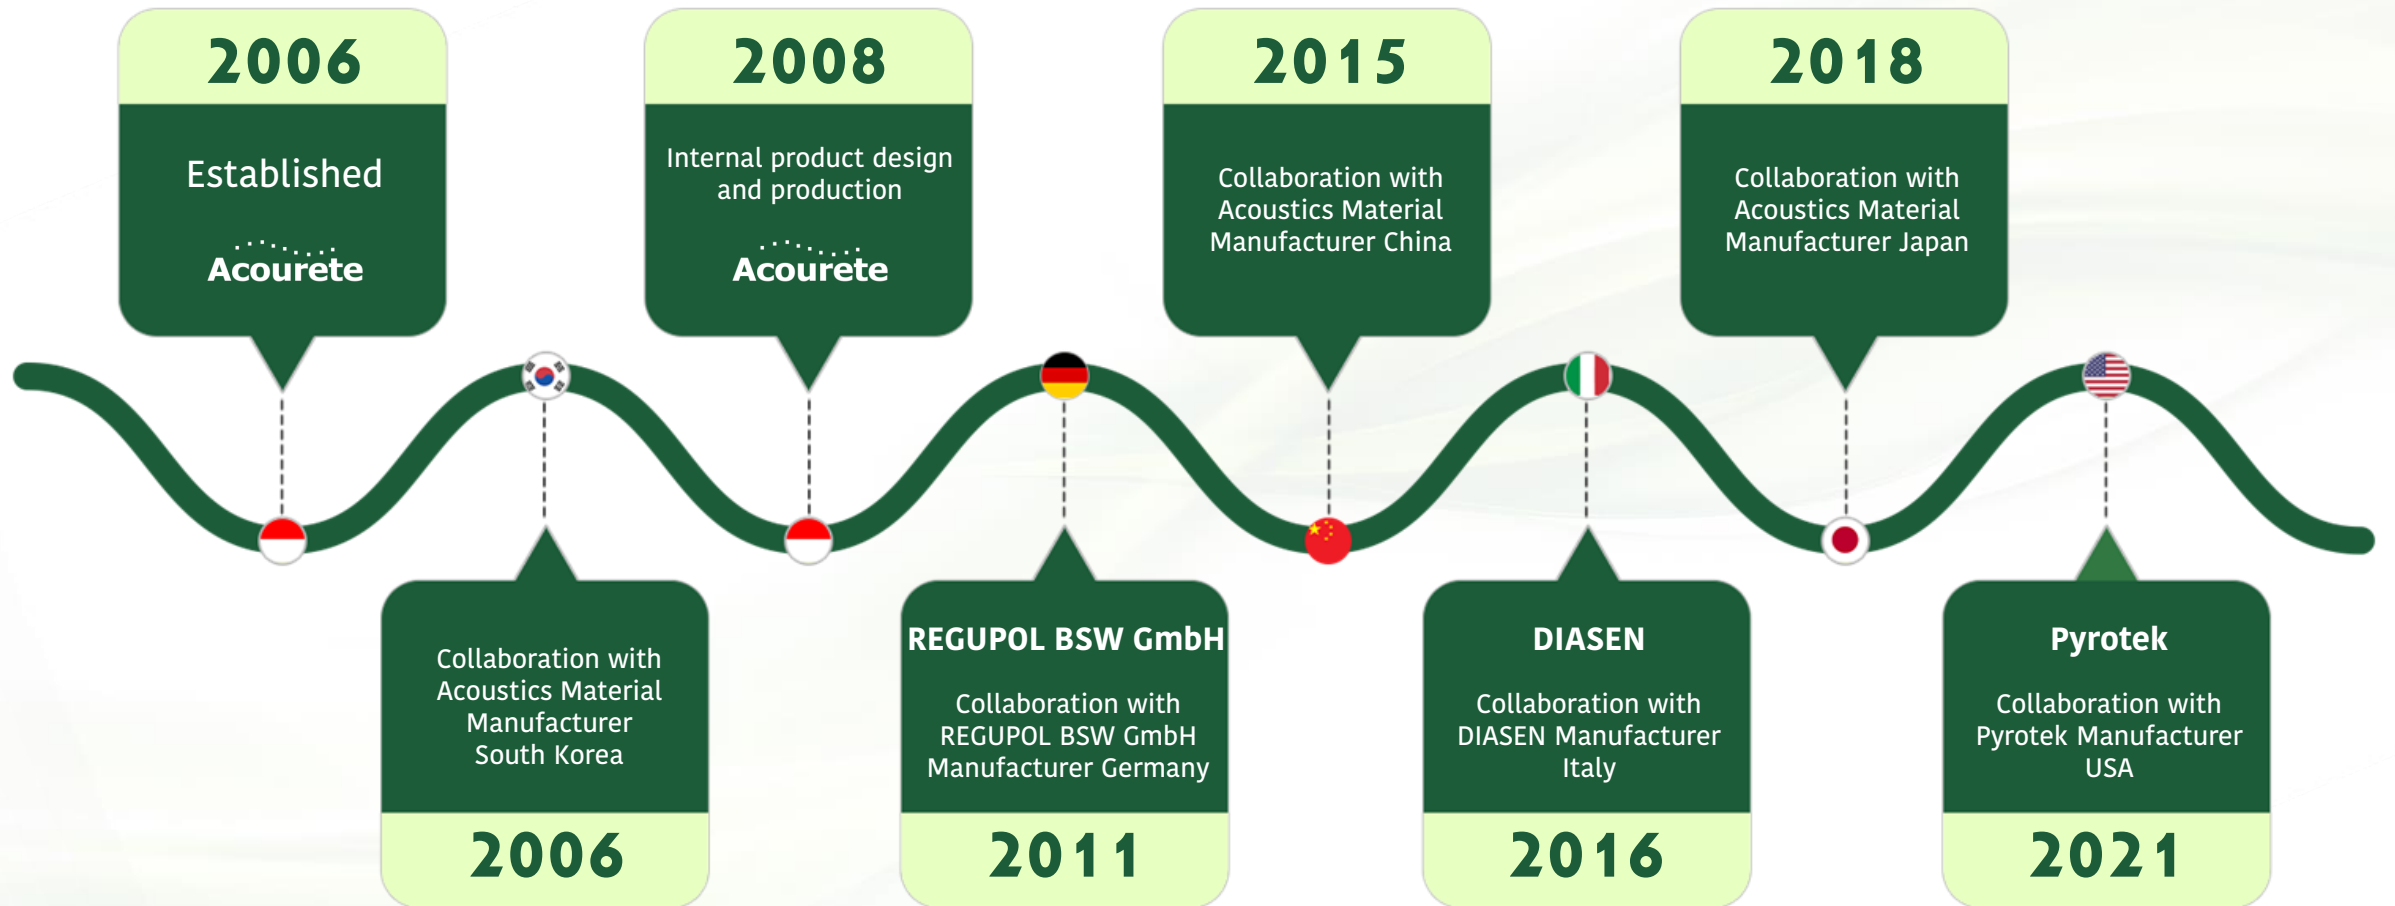

Since 2006 Acourete (Acoustic Revolutionary Technology) has been present in Indonesia to answer all the challenges that have been mentioned. With the spirit of revolutionary thinking, Acourete comes with revolutionary technology, to answer various challenges that are difficult to overcome with generic products available in the market.

We have best revolutionary material solutions,

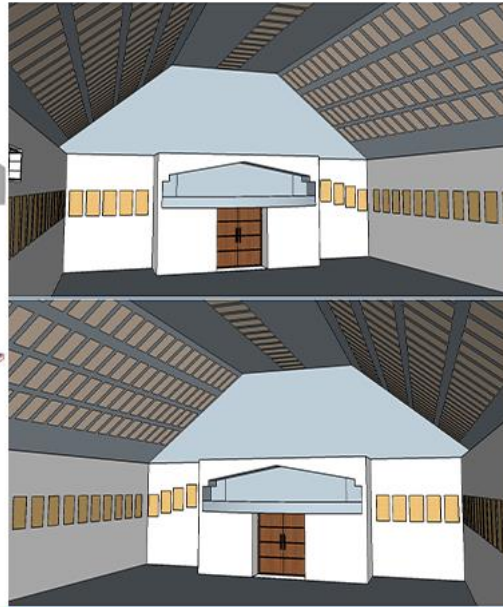

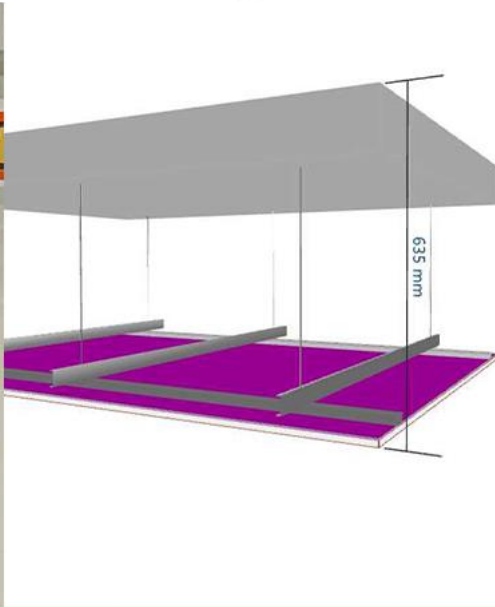

1. High acoustic performance
2. Easy to apply
3. Blend with design challenges and environmental conditions
4. Meet the criteria for green and healthy buildings.

Come join us to carry out the Technological Revolution to produce healthy sound quality !

PRODUCT DEVELOPMENT OF ACOURETE ACOUSTICS

Our Services

ON-SITE SURVEY

- Spatial Dimension Measurement
- Acoustic Assessment
- Problem Analysis

PREDICTION & MODELLING

- Predicting acoustic treatment.
- Modeling the analysis results.

PREVIEW & SCHEMATIC

- Recommendation acoustic materials based on client needs.
- Serving acoustic schematic drawings.

OUTLINE SPECIFICATION & BUDGET PLAN

- Creating an outline of acoustic specifications based on acoustic schematic drawings.
- Estimating the budget plan.

MANUAL INSTRUCTION

- Explaining the installation drawings of acoustic materials both online and offline.

HOUSES OF WORSHIP

“ Houses of worship is the holy place on the earth. Speech intelligibility is important, reverberation and background noise are the opponent of that. To make congregations feel comfortable and clearly to listen sermon, the interior should less of reverberation.

Also, when prayers do meditation and reflection of their sins, they need tranquility.

Our company provides a great variety of **absorbent material** to reduce reverb in the houses of worship.
